History Autodesk started as a Computer Aided Design firm, concentrating on architecture and engineering. It began with doing architectural design work, then shifted to structural engineering and construction engineering, eventually developing software for engineering as well as architecture and graphic design. AutoCAD, now the most successful of the company's products, started out as a desktop product for the first time in 1983, at the same time that the firm also started a new firm for its software engineering, Autodesk Systems. AutoCAD was originally developed for the Apple II, and it became the first Mac-based CAD program to be introduced. In 1982,

Autodesk released a version for the Apple II called PC-CAD for the Apple II and the IBM PC compatible. In 1984, AutoCAD for the Apple Macintosh was released, followed by a version for the IBM PC compatible, known as Autocad II, in 1985. The first version of AutoCAD that ran on Microsoft Windows (Windows 1.0) was released in 1987, and released in 1989 as AutoCAD 2.5. In 1990, AutoCAD released a special version for Microsoft Windows 3.0, allowing users to access the program without a graphics card. With the launch of Windows 95, the AutoCAD feature set was further enhanced, to include superior functionality with the addition of a new graphics engine and 2D and 3D layering, and full color. In addition, AutoCAD was also released for Unix/Linux, Microsoft Windows NT,

and Windows CE. In 1998, AutoCAD LT was released, containing limited features of AutoCAD and being marketed as a more user-friendly alternative. By 2006, the Apple OS had become less common, and fewer people were using computers with Apple II and Apple //e emulators. In 2008, AutoCAD was released for mobile and web in addition to desktop and laptop, making it available in all ways of computer use. By 2014, Autodesk products were released for mobile apps, including AutoCAD 2014, AutoCAD LT 2014, and AutoCAD WS 2014. The mobile app is available for the Apple iOS platform, and for Android devices. In 2017, Autodesk launched AutoCAD 360, a live, cloud-based service. As of March 2019, it is available for consumer use. Features
