By using sound forge for a while. You will have some kind of knowledge about noise reduction before talking about the keygen. I will try to explain my understanding:

Why the keygen is here? In software there are some things not including the keygens: In this kind of cases, as you know, the only way to solve the problem is to crack the software. Here, the keygen solves the problem on a data level. So, what does the keygen do? A keygen is like a porshack in computers. A Porshack is a popular program in which you can change the word you type in Word for Word or anyother program to have a password that you can change to the same thing you typed. Do you know what a cracker does with this porshack? I don't know but it is a software that uses a porshack to bypass copy protection. This is what a keygen does. Why keygens are so popular? I will not enter in how things can be sold in internet, I hope you are familiar with this kind of things. Sound Forge 8.0 Build 53 + Keygen + Noise Reduction Plugin 2.0a Keygen At the beginning we have some basic things. A company or a developer doesn't want people to work on their product. The Product is not only the software, but it is a business. Now, you can imagine this thing: Maybe your product is the audio tool we are talking about. We need to say in words what it is. REGNAME: The name of your product. V1.12c for Windows: The version of your product. s/n: The serial number of the product. ADW00195: The Publisher. AGW123456789: The Product. JYNX [GRS]: The Developer. HVtQ8zc8: The Programmer. Audio Compositor v3.0 March 08 Build : The Programmer-Developer. Jynx [GRS]: The Programmer. HVtQ8zc8: The Programmer-Developer. Key: The Key you have. 3-4231-59-56: your product serial number. Digital Input Noise Reduction DINR 1.0: The Algorithm. Note: The Algorithm is the
