Chinese man introduced the most powerful magic system in the history of the world: the civilization system. Previously, such a system was introduced in the fantasy game from the French company "Wing Wind". This is a game that allows you to form a party of three soldiers and then let you plunge into the dungeon together to fulfill the mission. It uses a "get you in/ get you out system". The progression of the game is called the "missions of the dungeon". However, in that case, only a fixed party of 3 people can be used. In the latest game, you can choose how many warriors you want to form a party of 3. Then, you can freely designate a "special weapon master", and "special armor master". The warrior skills that you master with these two masters are called "armor skills". Recently, the "Enhance" system, which became the subject of many games, was introduced. With this system, the player can increase the power of their weapons or armor. In addition, a system called "scaling techniques" was added to increase the power of skills. This is a system used to increase the power of the special armor master. This is an approach from the "counter-enhance" system, such as the one in the fantasy RPG "Vampire Lord 3". In the past, the system called "decision making" was used. However, now, "counter-decisioning" has been introduced. This system will allow you to choose the order of your actions while you are in a battle. In addition, the "coexistence decision making" system, in which you can decide what to do when you are in the middle of the battle, has also been introduced. These systems allow you to enjoy a novel approach to the game's battle system. ■ System overview The following is a summary of the system overview. □ Special armor master In the traditional fantasy games, there is a traditional "battle system" in which the hero attacks the enemy with a physical attack that is called a "weapon" and then the enemy is forced to attack the hero. The hero can change what the weapon will become by choosing the weapon that the hero is holding and the weapon attack pattern. In addition, the enemy attacks the hero with various defense skills. Therefore, the hero's character effectively controls the battle. In the new fantasy action RPG, the player selects "a customized warrior" and "armor master bff6bb2d33
