Î'Î»Î¹Î¿Î¯Î¿Î¼Î½Î½Î¿Ï□Ïİ□ - Home Science. com/downloadpdf/webmethodstutorialforbeginnerspdfdownload.com/ZMDv0. New York. 0007, 20,15 Sep 2017 @ IGI Global. home; downloads; General.Q: Oracle Query to Return Unknown Number of Fields in Result I have a query which returns multiple result sets, each with potentially 1 to 1 million rows. I want to use a view to quickly create a summary of all the results. I want to return the tables as columns. I've tried this: SELECT * FROM my_results_view UNION ALL SELECT 'Results' || ROWNUM FROM DUAL; However, this query gets an error which says that ROWNUM is only supported in a subquery. Is there any way to return 1 row which then lists the results table name and the ROWNUM value, for each result set? A: The error is that ROWNUM is not a column of the SELECT part of the query; it is of the DUAL table, which is also part of the query, so you cannot reference it there. You can, however, use a CTE. WITH r AS (SELECT 1 ROWNUM FROM DUAL UNION ALL SELECT 2 FROM DUAL UNION ALL SELECT 3 FROM DUAL UNION ALL SELECT 4 FROM DUAL) SELECT r.rownum, col1, col2, col3 FROM r; The WITH clause isn't strictly needed because you can reference the variable; however, it is clearer to include it because then you can also do: SELECT ROWNUM AS rownum, col1, col2, col3 FROM r; Q: php string replacement not working I want to remove! and $ from a string. The code below is not working. $username = str_replace('!', '', $username); $username = str_replace('$', '', $username); A: You're probably looking for: $username = preg_replace('/\!|\$/', 6d1f23a050
