---

In this article we will talk about decompilers for mt4, decompiling files from ex4 to mq4, pros and cons of decompilation. This article is written for people who are not familiar with mt4 or don't have much experience in decompiling, but would like to try. How does decompiling start? First, you load ex4 into a program, for example MT4Ex4Tool.exe. Then you go to the folder with the ex4 file called "Ex4->Ex4", and find there the file "mt4\_debug.xml". Then, you click on it with the right mouse button and click on "Open with" - "Extract File". In the window "Import File" you have to enter the name of the decompiler "MT4Ex4Tool".
